

POL 585: International Political Economy

Princeton University
Spring 2026

Professor Noah Zucker (noahzucker@princeton.edu)
Office hours by appointment ([sign up here](#)), 444 Robertson Hall

Seminar: Monday, 1:30–4:20 p.m., 008 Robertson Hall

This is a PhD-level introduction to international political economy (IPE). The course provides a broad survey of the field, covering both foundational classics and cutting-edge work from today. One purpose of the course is to prepare you for the IR general exam; the syllabus includes extensive supplemental reading lists to this end. You should approach the course with a more ambitious mindset, however, seeing it as an opportunity to explore research ideas and develop your own scholarship.

The main assignment for the course is an IPE-related research proposal (6,000–10,000 words; 50% of final grade). The proposal should consist of a research question, theory, empirical design, and any preliminary findings. You should see this as a chance to start on research that will ultimately be submitted for publication and/or contribute your dissertation. I strongly encourage you to meet with me early on and regularly throughout the semester to talk about the proposal. You should submit a two-page outline by March 18 that describes your planned research question, theory, and empirical design. The final proposal is due May 13.

You will also write three response memos during the semester, each discussing one or two readings for an assigned week (800–1,000 words each; 30% total). These memos are intended to stimulate thinking about future research and motivate the class discussion. Memos should critically evaluate selected papers, offer suggestions for improving the work, and illuminate paths for future research; they should not summarize the readings. Please email memos to me and your classmates by 12 noon the Sunday before class. You may be asked to discuss your memos in class.

The remainder of your grade is based on attendance and participation (20%). This is a discussion-based class. You should attend each class having carefully done all assigned readings, ready to offer comments on the arguments, empirical designs, and interconnections amongst them. Each student will serve as a discussion starter at least once. In this role, you will offer brief comments about assigned readings to kickstart the conversation. See [here](#) and [here](#) for tips on how to discuss academic work.

Summary of assignments:

- Research proposal (6,000–10,000 words): outline due March 18, final draft in May. Meet with me about this early on and throughout the semester.
- Response memos (800–1,000 words) for three classes: due by noon the Sunday before class.
- Discussion leadership of 1–2 classes.

I am happy to make accommodations if you anticipate barriers to your learning in the course. I am better able to do so if you let me know about these challenges sooner rather than later. If you will require accommodations due to a disability, you must register with the [Office of Disability Services](#); you should do so as soon as possible. I encourage you to then contact me at the beginning of the semester, or whenever the barrier arises, and again before course assessments so we can implement your ODS plan.

You may also experience mental health challenges during the semester. I encourage you to make use of the [on-campus mental health services](#). If you have an urgent concern, you may [go here](#) for support. Counselors are available 24/7 through the CPS Cares Line (609-258-3141).

Note that most readings on this syllabus are published. To get a sense of what IPE scholars are currently working on, I recommend checking out the programs of recent [IPES](#) and [PEIO](#) conferences.

Taking careful notes on readings today will pay dividends well into the future. People have different strategies for note taking. I usually take notes in the following format:

- Research question: What do the authors want to explain? Why is the question worth asking?
- Earlier arguments: What are prior answers to that question? Why are they insufficient?
- Key claim: What do the authors propose as an answer to their question? What are the explanatory variables and causal mechanisms linking them to the outcome?
- Evidence: What data do the authors use to test their claims? What research design do they employ?
- Findings: What are the authors' empirical findings?
- Comments: Space for you to jot down your thoughts on the reading (limitations, innovations, connections to other work, ideas for extensions).

Semester at a glance:

1. [Introduction](#) (January 26)
 2. [Trade I: Conflict and Cooperation](#) (February 2)
 3. [Trade II: Societal Coalitions](#) (February 9)
 4. [Trade III: Special Interests](#) (February 16)
 5. [Money](#) (February 23)
 6. [Debt](#) (March 2)
 7. [Foreign Direct Investment](#) (March 16)
 8. [Backlash to Globalization](#) (March 23)
 9. [Financial Governance](#) (March 30)
 10. [Climate Change](#) (April 6)
 11. [Migration](#) (April 13)
 12. [Security and Statecraft](#) (April 20)
-

Introduction (January 26)

1. Frieden and Rogowski 2014, “Modern Capitalism: Enthusiasts, Opponents, and Reformers,” in *The Cambridge History of Capitalism* (eds. Neal and Williamson), Cambridge University Press.
2. Helleiner 2023, *The Contested World Economy: The Deep and Global Roots of International Political Economy*, Cambridge University Press. [Pages 19–36, 37–46, 56–62, 87–94, 239–252.]
3. Cohen 2008, *International Political Economy: An Intellectual History*, Princeton University Press. [Chapter 1.]
4. Rickard 2021, “Open Economy Politics Revisited,” in *The Oxford Handbook of International Political Economy* (eds. Pevehouse and Seabrooke), Oxford University Press.
5. Goddard and Newman 2025, “Further Back to the Future: Neo-Royalism, the Trump Administration, and the Emerging International System,” *International Organization*.

Recommended for those without a background in international economics:

- Krugman, Obstfeld, and Melitz 2018, “The Instruments of Trade Policy,” in *International Economics: Theory and Policy* (11th edition), Pearson.

Further reading:

- Lake 2009, “Open Economy Politics: A Critical Review,” *Review of International Organizations*.
- Chaudoin, Milner, and Pang 2015, “International Systems and Domestic Politics: Linking Complex Interactions with Empirical Models in International Relations,” *International Organization*.
- Blyth and Matthijs 2017, “Black Swans, Lame Ducks, and the Mystery of IPE’s Missing Macroeconomy,” *Review of International Political Economy*.
- Milner, Powers, and Voeten 2023, “The Myth of the Eclectic IR Scholar?,” *International Studies Perspective*.

Trade I: Conflict and Cooperation (February 2)

1. Krasner 1976, “State Power and the Structure of International Trade,” *World Politics*.
2. Keohane 1984, *After Hegemony: Cooperation and Discord in the World Political Economy*, Princeton University Press. [Pages 7–10, 51–55, 85–98, 111–116]
3. Morrison 2012, “Before Hegemony: Adam Smith, American Independence, and the Origins of First Era of Globalization,” *International Organization*.
4. Gowa and Mansfield 1993, “Power Politics and International Trade,” *American Political Science Review*.
5. Bagwell and Staiger 2010, “The World Trade Organization: Theory and Practice,” *Annual Review of Economics*.
6. Carnegie 2014, “States Held Hostage: Political Hold-Up Problems and the Effects of International Institutions,” *American Political Science Review*.

For a debate on the effects of the WTO, see:

- Rose 2004, "Do We Really Know That the WTO Increases Trade?," *American Economic Review*.
